## American Photonics

Solutions through technology.

**Allow us to introduce ourselves. We are American Photonics!**

We look forward to being your future partner in the CO<sub>2</sub> laser business. As you know, we manufacture focusing lenses and other optics for your CO<sub>2</sub> laser. We also carry a full line of other laser consumables, all at competitive prices. We use 100% U.S. material making us the only optics manufacturer to be a 100% U.S. made. We would like very much to work with you and your lasers. Our quality is outstanding and our pricing is competitive.

We invite you, also, to visit our website, [www.americanphotonics.com](http://www.americanphotonics.com), to see how we can help you save money and increase productivity.

We know that after you test our lenses, you will select American Photonics as your main supplier for CO<sub>2</sub> laser lenses, but for now we just want to have your attention and consideration to be your backup supplier. Our current customers are very loyal and extremely happy with our quality, performance and long time partnership. We are here if you need us, from beginning to end. We are proud to be a 4th generation manufacturing family. Please utilize our knowledge, skills and dedication to your advantage.

**As a welcome gift, we are offering you**
